ALUMINUM 6061

Hadco Metal Trading stocks and distributes metal products to the commercial, military and aerospace industries. With over 200,000 sq ft. of warehouse space on the east coast, Hadco's inventory of aluminum, magnesium, stainless steel and related alloys is available for immediate delivery on our own fleet of trucks. Our product line includes a wide variety of shapes and sizes including sheet, plate, rod, bar, tube, pipe and extruded shapes.

Hadco's 4 branches are strategically located in the New York metro area, Philadelphia and the east and west coasts of Florida. Our range of high precision cutting equipment yields precise cuts regardless of the alloy, shape or size you require. In our branches you can find band saws, disc saws, stone plate saws and shears for cutting plates, sheets and long products.

We hold in stock a range of aerospace aluminum materials in the 2XXX series and the 7XXX series, and materials in the 5XXX series for the ship building industry. We also hold commercial aluminum alloys in the 1XXX, 3XXX, 5XXX and 6XXX series. The 6061 aluminum plate is known for its weldability and its excellent machinability, making it versatile for a wide range of applications and end-uses. Stress-relieving tempers are available both in plates (T651, T652) and the following shapes: sheets, flats, round & square bars, angles, rectangular/ square tubes and hollow bars (T6, T651, T6511).

Processing capabilities - Our range of high precision cutting equipment yields precise, zero-defect cuts regardless of the alloy, shape or size you require. In our processing equipment you can find band saws, disc saws, and shear for cutting plates, sheets and long products, as well as fully automatic "Schelling" precision saws (plates up to 250mm/10" thickness by 4.0 meters/157" in length).
